

Anirudh Hegde

Data Analyst | BI & Product Analytics | SQL, Python, Power BI, dbt

Gurugram, India | anirudh.hegde07@gmail.com | +91 9999982364 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Data Analyst with 3+ years of experience across SaaS, automotive, and manufacturing. Skilled in SQL, Python, Power BI, PostgreSQL, dbt, A/B testing, forecasting, Business Intelligence, KPI reporting, and dashboard development. MS in Data Analytics Engineering from Northeastern University; based in Gurugram, immediately available, and open to relocation across India.

EXPERIENCE

Data Analyst | Ipserlab LLC, USA

Jul 2025 – May 2026

- Analysed the RFQ marketplace funnel across buyer requests, manufacturer matching, quote submission, and status tracking, identifying key handoff and drop-off points across the buyer journey
- Defined marketplace KPI requirements for RFQ volume, quote turnaround time, manufacturer response rate, buyer conversion, and funnel drop-off analysis, translating product workflows into analytics-ready specifications
- Designed and maintained PostgreSQL schemas across buyer, manufacturer, RFQ, quote, and transaction entities, creating synthetic test datasets to validate pipeline logic, data integrity, and reporting reliability before deployment

Assistant Manager, Powertrain Planning | Maruti Suzuki India Limited, India

Jun 2022 – Jul 2023

- Benchmarked 8 powertrain variants against 240+ competitor models, synthesising technology, fuel-efficiency, and regulatory trends into a data-backed roadmap adopted by senior leadership
- Owned end-to-end CAFE compliance analytics for the full vehicle fleet, modelling engine-wise fuel-efficiency projections, sales-mix scenarios, and emissions impact to identify optimisation opportunities and contribute to a 10% improvement in projected fuel-efficiency targets
- Developed engine-wise sales and carbon-emission forecasts through 2027 and built a Power BI dashboard tracking weekly actuals against projections, enabling leadership to monitor compliance gaps and adjust powertrain strategy
- Represented Maruti Suzuki at Auto Expo 2023 and India Energy Week; led internal R&D workshops on analytical tools, forecast interpretation, and data-backed planning methodologies

Assistant Manager | Godrej & Boyce Mfg Co Ltd, India

Jan 2021 – Jun 2022

- Analysed project performance across 3–4 concurrent government B2B contracts, tracking cost variance, timeline adherence, resource utilisation, and delivery risks to support project planning and execution
- Built weekly Power BI dashboards consolidating completion status, progress metrics, site issues, and financial variance, replacing manual reporting with a centralised view for senior management
- Conducted sales-pipeline analysis across active client accounts, scoring and prioritising high-value opportunities to support data-driven client prioritisation
- Tracked weekly budget vs actuals across procurement, labour, and operations, flagging variance early and presenting findings in client and internal reviews to tighten cost control

PROJECTS

AI SaaS Retention & Competitive Intelligence Platform | dbt Core, PostgreSQL, Python, XGBoost, GitHub Actions [Link](#)

- Built an end-to-end analytics engineering pipeline ingesting 500K+ behavioural records and Product Hunt API data into a layered PostgreSQL warehouse with dbt Core, modelling raw data into staging models and analytics-ready marts
- Analysed cohort retention and trained an XGBoost churn model achieving 0.71 AUC-ROC, uncovering 70% month-1 churn and 8x longer retention for Power Users vs. New Users; enforced data quality with 42 automated dbt tests

E-commerce Conversion Optimisation | Python, SciPy, Pandas, Plotly, Streamlit [Link](#)

- Designed and analysed an A/B test for 2,000 users using Chi-Square and Fisher's Exact tests across region and device segments to evaluate a new product-page design
- Identified a significant negative interaction in the Europe + Tablet segment ($p=0.0151$) and recommended targeted rollout with further segment validation rather than full deployment

Automated Bilingual Complaint Classification System | Python, Airflow, GCP, Vertex AI, BigQuery, mBERT [Link](#)

- Built an end-to-end data pipeline for bilingual complaint classification, designing Airflow DAGs for preprocessing, PII anonymisation, schema validation, and drift detection across 500K+ CFPB complaints
- Fine-tuned mBERT and XLM-RoBERTa models achieving F1 scores of 0.69 and 0.68; deployed the workflow on Vertex AI with CI/CD automation and Fairlearn-based bias monitoring

SKILLS

SQL & Data Modelling:	SQL, PostgreSQL, dbt Core, ETL/ELT, CTEs, Window Functions, Data Marts, Schema Design, Data Quality Testing
BI & Visualisation:	Power BI, Tableau, Streamlit, Plotly, Business Intelligence, KPI Reporting, Dashboard Development, Executive Reporting
Product Analytics:	A/B Testing, Experimentation, Hypothesis Testing, Statistical Analysis, Cohort Analysis, Retention, Churn Modelling, Funnel Analysis, Forecasting, Stakeholder Management, Requirements Gathering
Python & Data Science:	Python, Pandas, NumPy, SciPy, Scikit-learn, XGBoost, Random Forest, Logistic Regression, K-Means Clustering, NLP, Model Evaluation
Data Engineering:	GitHub Actions, Airflow, Docker, GCP (Vertex AI, BigQuery, Cloud Run), CI/CD, Data Pipelines, Data Validation

EDUCATION

Northeastern University, Boston, Massachusetts

May 2025

Master of Science in Data Analytics Engineering, GPA: 3.92/4.0

Guru Gobind Singh Indraprastha University, New Delhi, India

Sept 2020

Bachelor of Technology in Mechanical and Automation Engineering
