SUMMARY

Data Analyst with 4+ years of experience enabling product, operations, and leadership decision-making through SQL, Python, and business intelligence. Experience defining core metrics, building executive dashboards, and translating data into pricing, retention, and go-to-market decisions across SaaS, automotive, and manufacturing environments.

EXPERIENCE

Data Analyst | Ipserlab LLC, USA

Jul 2025 – Present

- Defined and operationalized core marketplace metrics (buyer conversion, vendor response time, transaction volume) using SQL definitions and dashboards; established a company-wide standard that informed two roadmap reprioritizations and a pricing model revision
- Designed a PostgreSQL marketplace data model (10+ tables), implementing Python- and SQL-based validation checks that eliminated metric inconsistencies and enabled reliable leadership reporting
- Led competitive and vendor analysis across 25+ vendors and 5+ competitors, leveraging LLM tools to identify pricing gaps and feature tradeoffs that shaped product differentiation and supported two go-to-market pivots
- Partnered with Product and Operations leads in weekly metric reviews, applying funnel analysis to translate performance shifts into prioritized product and operational actions

Data Analyst | Maruti Suzuki India Limited, India

Jun 2022 – Jul 2023

- Built an executive Power BI dashboard tracking KPIs across 240+ vehicle models, consolidating 6+ data sources from AWS S3 and reducing reporting prep from 3 days to 4 hours for senior leadership
- Analyzed 50K+ dealer sales records in AWS Redshift using SQL (joins, window functions) to segment customers by purchase behavior and region, surfacing high-value buyer profiles that guided targeted marketing campaigns across 15+ regions
- Led competitive intelligence across 10+ OEM competitors, tracking pricing, features, and market share; presented quarterly findings to VP-level leadership, shaping positioning and pricing strategy
- Delivered weekly KPI readouts and market intelligence briefs to 20+ stakeholders using Power BI; reporting cadence adopted in global planning discussions with Suzuki Japan

Data Analyst | Godrej & Boyce Mfg Co Ltd, India

Jan 2021 – Jun 2022

- Evaluated client account performance using SQL and Power BI; quantified revenue concentration, showing that top clients contributed 60% of revenue and driving account prioritization decisions
- Developed a client health dashboard integrating delivery timelines, cost variance, and satisfaction indicators across 10+ projects; enabled early identification of at-risk accounts, contributing to a 20% improvement in client retention
- Performed root-cause analysis on project cost overruns and delivery bottlenecks, translating findings into targeted operational recommendations that reduced cost overruns by 15%

Business Analyst | AG Electrochem, India

May 2019 – Jan 2021

- Conducted monthly sales analysis using Python and SQL on 30+ SKUs across 60 accounts, uncovering product performance and regional demand trends that informed pricing decisions and helped prioritize high-value accounts
- Automated weekly and monthly sales reporting across 5 regions, enabling the sales team to identify underperforming accounts and prioritize follow-ups, improving response time by 15%
- Executed RFM-based customer segmentation, isolating the top 20% of accounts contributing 65% of revenue; insights supported retention planning and inventory prioritization, reducing stockouts by 25%

PROJECTS

E-commerce Conversion Optimization | Python, SciPy, Pandas, Plotly, Streamlit [Link](#)

- Designed an A/B test framework for 2K users using Chi-Square and Fisher's Exact tests; identified a segment (Europe + Tablet) where the new design dropped conversion from 18% to 0%, recommending targeted rollout over full deployment

Customer Churn Prediction Engine | Python, Scikit-learn, SHAP, Streamlit [Link](#)

- Built a churn prediction system (Random Forest, SHAP) achieving 0.83 AUC on 7K records; implemented profit-curve thresholding that optimized retention spend, demonstrating potential 3x ROI on retention campaigns in simulated scenarios

SKILLS

Data Analysis & Querying:	SQL (CTEs, Window Functions, Joins), PostgreSQL, Data Modeling, ETL, Data Warehousing
BI & Reporting:	Power BI, Tableau, Excel (Pivot Tables, VLOOKUP), KPI Dashboards, Executive Reporting
Analytics & Experimentation:	A/B Testing, Hypothesis Testing, Power Analysis, Chi-Square, Cohort Analysis, Funnel Analysis, Segmentation
Python & Statistical Analysis:	Python (Pandas, NumPy), Statistical Analysis, Exploratory Data Analysis
Customer & Product Analytics:	Churn Analysis, CLV Modeling, RFM Analysis, Retention Analysis, K-Means Clustering
Tools & Platforms:	Git, GitHub, Jira, AWS (S3, Redshift), Azure, Databricks, PySpark, Amplitude, LLM tools (Claude, Gemini)

EDUCATION

Northeastern University, Boston, Massachusetts

May 2025

Master of Science in Data Analytics Engineering, GPA: 3.92

Guru Gobind Singh Indraprastha University, New Delhi, India

Sept 2020

Bachelor of Technology in Mechanical and Automation
