

Anirudh Hegde

Data Analyst | Product Analytics | SQL, Python, Power BI, dbt

Gurugram, India | anirudh.hegde07@gmail.com | 999982364 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Data Analyst with 3+ years of experience across SaaS, automotive, and manufacturing. Skilled in SQL, Python, Power BI, PostgreSQL, dbt, A/B testing, forecasting, and dashboard development. MS in Data Analytics Engineering from Northeastern University; based in Gurugram and open to relocation across India.

EXPERIENCE

Data Analyst | Ipserlab LLC, USA

Jul 2025 – May 2026

- Analysed RFQ marketplace workflows across buyer requests, manufacturer matching, quote submission, and status tracking, translating product requirements into structured data specifications for workflow visibility
- Managed PostgreSQL schema updates for buyer, manufacturer, RFQ, quote, and transaction data, ensuring core platform tables supported clean workflow tracking, validation, and analytics-ready reporting
- Designed synthetic test datasets covering incomplete RFQs, quote status changes, duplicate records, and edge-case marketplace flows to validate backend pipeline logic, data integrity, and system reliability before production deployment
- Collaborated with backend engineers to define data requirements for marketplace KPIs such as RFQ volume, quote turnaround time, manufacturer response rate, buyer conversion tracking, and funnel drop-off analysis

Assistant Manager, Powertrain Planning | Maruti Suzuki India Limited, India

Jun 2022 – Jul 2023

- Conducted competitive benchmarking across 8 powertrain variants and 240+ models, synthesising technology trends, fuel-efficiency benchmarks, and regulatory shifts into data-backed roadmap recommendations adopted by senior leadership
- Owned end-to-end CAFE compliance analytics for the full vehicle fleet, modelling engine-wise fuel-efficiency projections, sales-mix scenarios, and emissions impact to identify optimisation opportunities and contribute to a 10% improvement in projected fuel-efficiency targets
- Developed engine-wise sales and carbon-emission forecasts through 2027 and built a Power BI dashboard tracking weekly actuals against projections, enabling leadership to monitor compliance gaps and adjust powertrain strategy
- Represented Maruti Suzuki at Auto Expo 2023 and India Energy Week; led internal R&D workshops on analytical tools, forecast interpretation, and data-backed planning methodologies

Assistant Manager | Godrej & Boyce Mfg Co Ltd, India

Jan 2021 – Jun 2022

- Analysed project performance across 3–4 concurrent government B2B contracts, tracking cost variance, timeline adherence, resource utilisation, and delivery risks to support project planning and execution
- Built weekly Power BI dashboards consolidating completion status, progress metrics, site issues, and financial variance, replacing manual reporting with a centralised view for senior management
- Conducted sales pipeline analysis and maintained client account data across potential opportunities, identifying high-value accounts and supporting data-driven client prioritisation
- Tracked and reported weekly budget vs actuals across procurement, labour, and operations, presenting findings in client and internal review meetings to improve alignment and delivery visibility

PROJECTS

AI SaaS Retention & Competitive Intelligence Platform | dbt Core, PostgreSQL, Python, XGBoost, Streamlit, GitHub Actions [Link](#)

- Built an end-to-end analytics engineering pipeline ingesting 500K+ behavioural records and Product Hunt API data into a layered PostgreSQL warehouse using dbt Core, modelling raw data into staging models and analytics-ready marts
- Analysed cohort retention, churn patterns, and user segments, uncovering 70% month-1 churn and an 8x survival gap between Power Users and New Users; implemented 42 automated dbt tests with GitHub Actions CI

E-commerce Conversion Optimisation | Python, SciPy, Pandas, Plotly, Streamlit [Link](#)

- Designed and analysed an A/B test for 2,000 users using Chi-Square and Fisher's Exact tests to evaluate conversion impact of a new product page design across region and device segments
- Identified a critical Europe + Tablet segment interaction where treatment conversion dropped from 18.4% to 0% ($p=0.0151$), presenting confidence intervals and recommending targeted rollout over full deployment

Automated Bilingual Complaint Classification System | Python, Airflow, Docker, GCP, Vertex AI, BigQuery, mBERT, GitHub Actions [Link](#)

- Built an end-to-end data pipeline for bilingual complaint classification, designing Airflow DAGs for preprocessing, PII anonymisation, schema validation, and drift detection across 500K+ CFPB complaints
- Fine-tuned mBERT and XLM-RoBERTa models achieving F1 scores of 0.69 and 0.68; deployed the workflow on Vertex AI with CI/CD automation and Fairlearn-based bias monitoring

SKILLS

SQL & Data Modelling:	SQL, PostgreSQL, dbt Core, CTEs, Window Functions, Data Marts, Schema Design, Data Quality Testing
Product Analytics:	A/B Testing, Hypothesis Testing, Cohort Analysis, Retention, Churn Modelling, Funnel Analysis, Forecasting
BI & Visualisation:	Power BI, Tableau, Streamlit, Plotly, Excel, Dashboard Development, Executive Reporting
Python & Data Science:	Python, Pandas, NumPy, SciPy, Scikit-learn, XGBoost, Random Forest, Logistic Regression, K-Means Clustering
Data Engineering:	GitHub Actions, Airflow, Docker, GCP (Vertex AI, BigQuery, Cloud Run), CI/CD, Data Validation

EDUCATION

Northeastern University, Boston, Massachusetts

May 2025

Master of Science in Data Analytics Engineering, GPA: 3.92/4.0

Guru Gobind Singh Indraprastha University, New Delhi, India

Sept 2020

Bachelor of Technology in Mechanical and Automation
