

# Anirudh Hegde

Data Analyst | Business Intelligence Analyst | Product Analyst

8574924515 | Boston, MA | anirudh.hegde07@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## SUMMARY

Data Analyst with 4+ years of experience delivering business and product insights through SQL, Python, and BI tools. Strong background in dashboard development, experimentation (A/B testing), and customer analytics, with hands-on experience building churn prediction, CLV, and segmentation models to support growth and retention strategies. Proven ability to translate complex analyses into actionable insights for cross-functional stakeholders.

## SKILLS

|                                         |                                                                                                |
|-----------------------------------------|------------------------------------------------------------------------------------------------|
| <b>Programming &amp; Analytics:</b>     | Python (pandas, NumPy, scikit-learn), SQL (CTEs, window functions), Excel (Advanced)           |
| <b>Analytics &amp; Experimentation:</b> | A/B Testing, Hypothesis Testing, Chi-square, T-tests, Power Analysis, Segmentation, Regression |
| <b>Machine Learning :</b>               | Random Forest, XGBoost, Clustering, Churn Analysis, CLV Modeling, SHAP Explainability          |
| <b>Data Visualization &amp; BI:</b>     | Power BI, Tableau, Plotly, Streamlit, Dashboard Development, KPI Tracking, Data Storytelling   |
| <b>Tools:</b>                           | PostgreSQL, Git/GitHub, Jira, Azure Data Factory, Databricks (PySpark), or Synapse Analytics   |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                          |
