SUMMARY

Data Analyst with 4+ years of experience turning raw data into business decisions across SaaS, automotive, and manufacturing. Core strengths in dimensional modeling, KPI standardization, funnel analysis, experimentation, and stakeholder-facing reporting using PostgreSQL, Redshift, dbt Core, Python, and SQL-based data validation.

EXPERIENCE

Data Analyst | Ipserlab LLC, USA

Jul 2025 – Present

- Standardized company-wide KPI definitions for buyer conversion, vendor response time, and transaction volume in SQL, creating a single source of truth that informed two product roadmap changes and a pricing revision
- Led weekly funnel reviews with Product and Operations using SQL-based pipeline analysis; translated drop-off patterns into prioritized actions and accelerated issue resolution across the buyer journey
- Built a PostgreSQL marketplace data model across 10+ tables spanning buyers, vendors, listings, and transactions, replacing one-off queries with reusable transformations that stabilized reporting workflows
- Implemented data validation checks in Python and SQL (null detection, join integrity, freshness logic); prevented upstream data issues from propagating into executive KPI reporting

Data Analyst | Maruti Suzuki India Limited, India

Jun 2022 – Jul 2023

- Modeled 50K+ dealer sales records in Amazon Redshift using window functions and multi-level joins; segmented customers by purchase behavior and region, surfacing high-value buyer profiles that guided targeted campaigns across 15+ regions
- Designed an executive Tableau dashboard tracking KPIs across 240+ vehicle models; reduced leadership reporting prep from 3 days to 4 hours by replacing manual data pulls with a structured, automated reporting layer
- Owned weekly KPI reporting for 20+ stakeholders across sales, marketing, and operations; the framework was later adopted into global planning discussions with Suzuki Japan
- Conducted quarterly competitive analysis across 10+ OEMs tracking pricing, features, and market share; presented findings to VP-level leadership to support national positioning and pricing strategy

Data Analyst | Godrej & Boyce Mfg Co Ltd, India

Jan 2021 – Jun 2022

- Built a SQL-based client health model across 10+ projects, integrating delivery timelines, cost variance, and satisfaction indicators to identify at-risk accounts earlier
- Performed root-cause analysis on project cost overruns using SQL; traced overspend to supplier delays and reporting gaps, supporting operational fixes that reduced overruns by 15%
- Quantified revenue concentration across 40+ client accounts; identified that top 5 accounts contributed 60% of revenue, directly informing retention prioritization and resource allocation
- Delivered a Power BI client health dashboard consolidating project performance and financial metrics; contributed to a 20% improvement in client retention by enabling earlier intervention

Business Analyst | AG Electrochem, India

May 2019 – Jan 2021

- Executed RFM-based customer segmentation across 60 accounts; identified the top 20% contributing 65% of revenue and supported targeted retention and inventory prioritization
- Automated weekly and monthly sales reporting across 5 regions using Python; eliminated manual spreadsheet work, improved response time by 15%, and contributed to a 25% reduction in stockouts

PROJECTS

AI SaaS Retention & Competitive Intelligence Platform | *dbt Core, PostgreSQL, Python, XGBoost, Streamlit, GitHub Actions* [Link](#)

- Built a layered PostgreSQL warehouse (raw to staging to marts) with dbt Core, ingesting 500K+ Yelp events and Product Hunt API data; uncovered 70% month-1 churn and an 8x survival gap between Power Users and New Users
- Developed Kaplan-Meier survival analysis and an XGBoost churn prediction model, identifying review count and review frequency as the strongest predictors of long-term retention
- Implemented 31 automated dbt tests and GitHub Actions CI running dbt build on every push; built a Streamlit dashboard to visualize retention cohorts, survival curves, and competitive intelligence across AI product categories

E-commerce Conversion Optimization | *Python, SciPy, Pandas, Plotly, Streamlit* [Link](#)

- Designed an A/B test framework for 2K users using Chi-Square and Fisher's Exact tests; identified a segment (Europe + Tablet) where the new design dropped conversion from 18% to 0%, recommending targeted rollout over full deployment

SKILLS

Data Warehousing & Modeling: SQL, PostgreSQL, Amazon Redshift, Dimensional Modeling, dbt Core

Analytics & Validation: Python, Pandas, NumPy, Data Quality Testing, KPI Standardization, Root-Cause Analysis

BI & Product Analytics: Tableau, Power BI, Funnel Analysis, Cohort Analysis, Stakeholder Reporting

Analytics & Experimentation: A/B Testing, Hypothesis Testing, Chi-Square Testing, RFM, Churn Analysis, CLV Modeling, Retention Analysis

Tools & Platforms: Git, GitHub Actions, Streamlit, Jira, AWS (S3, Redshift), Amplitude, Julius AI

EDUCATION

Northeastern University, Boston, Massachusetts

May 2025

Master of Science in Data Analytics Engineering, GPA: 3.92

Guru Gobind Singh Indraprastha University, New Delhi, India

Sept 2020

Bachelor of Technology in Mechanical and Automation
