

Anirudh Hegde

Data Analyst | Business Intelligence Analyst | Analytics Engineer

8574924515 | Boston, MA | anirudh.hegde07@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Data Analyst with 4+ years of experience delivering business and product insights through SQL, Python, and BI tools. Strong background in dashboarding, experimentation (A/B testing), customer analytics, and decision optimization, with hands-on experience building churn prediction, CLV, and segmentation models to support growth and retention strategies. Proven ability to translate complex analyses into clear, actionable insights for cross-functional stakeholders.

SKILLS

Programming & Analytics:	Python (pandas, NumPy, scikit-learn), SQL (CTEs, window functions), Excel (Advanced)
Analytics & Experimentation:	A/B Testing, Hypothesis Testing, Chi-square, T-tests, Power Analysis, Segmentation, Regression
Machine Learning :	Random Forest, XGBoost, Clustering, Churn Analysis, CLV Modeling, SHAP Explainability
Data Visualization & BI:	Power BI, Tableau, Plotly, Streamlit, Dashboard Development, KPI Tracking, Data Storytelling
Tools:	Azure Data Factory, Databricks (PySpark), Synapse Analytics, Git/GitHub, Jira

EXPERIENCE

Assistant Manager (Data Analyst) Maruti Suzuki India Limited	June 2022 – July 2023 Gurugram, India
- Analyzed sales and market data across 8+ passenger vehicle segments using SQL, Python, and Excel to support quarterly product planning and launch sequencing with product teams - Developed and maintained Power BI dashboards tracking weekly sales volume, regional market share, and dealer performance KPIs; used by department heads and senior management in weekly planning reviews - Conducted competitor and market trend analysis using industry reports and internal sales data to assess demand shifts for upcoming models; presented findings to cross-functional teams across sales, marketing, and engineering - Represented Maruti Suzuki at Auto Expo 2023 and India Energy Week (G20), supporting senior leadership with data-backed product briefs and market insights for investor and partner discussions	
Assistant Manager (Business Analyst) Godrej & Boyce Mfg Co Ltd	Jan 2021 – June 2022 New Delhi, India
- Tracked and analyzed project performance metrics including SLA compliance, turnaround time, escalation rates, and service quality scores using SQL and Excel across 5+ concurrent service engagements; delivered weekly performance insights to senior management - Developed Power BI dashboards to monitor project financials, budget variances, and delivery status, providing leadership with near real-time visibility into cost and operational performance across multiple client accounts - Analyzed operational data using Python (pandas) and SQL to identify process bottlenecks and recurring inefficiencies; collaborated with cross-functional teams using Jira to prioritize fixes and support on-time delivery and resource allocation decisions	
Business Analyst AG Electrochem	May 2019 – Jan 2021 Gurugram, India
- Analyzed sales and customer data using Python and SQL to track product-wise performance, regional demand trends, and customer mix, supporting monthly sales planning, account reviews, and pricing discussions - Conducted market and supply-chain analysis to identify demand patterns, inventory gaps, and fulfillment risks; prepared summary reports for sales and operations teams to support inventory planning and customer development decisions	

PROJECTS

Customer Churn Prediction Engine <i>Python, XGBoost, Random Forest, SMOTE, SHAP</i> Link
- Built a churn prediction system using Random Forest and SMOTE, achieving 0.83 ROC-AUC with profit-optimized decision thresholds - Applied SHAP-based explainability to identify key churn drivers and designed a budget-constrained targeting approach for high-risk customers - Developed an interactive Streamlit app for churn scoring, risk classification, and retention recommendations
E-commerce Conversion Optimization <i>Python, Statistical Testing, Pandas, Plotly</i> Link
- Evaluated conversion performance from a product page A/B test using Python and SQL, analyzing device-level and regional segment behavior - Applied statistical tests (Chi-square, Fisher's Test, power analysis) on 2K observations to validate results and inform a selective rollout decision
FinSight Nexus – Financial Portfolio Analytics <i>Azure Data Factory, Databricks (PySpark), Synapse Analytics, Power BI</i> Link
- Structured and transformed portfolio data using Data Factory, Databricks, and Synapse Analytics to support consistent performance reporting - Built Power BI dashboards analyzing portfolio allocation, returns, and risk trends, streamlining recurring analysis workflows
Customer Value Intelligence System <i>Python, SQL, RFM, K-Means, BG/NBD, Streamlit</i> Link
- Built an end-to-end customer value engine using RFM analysis, clustering, and probabilistic CLV forecasting (BG/NBD, Gamma-Gamma) - Developed an interactive Streamlit dashboard to surface value tiers, at-risk customers, and growth segments for data-driven targeting

EDUCATION

Northeastern University, Boston, Massachusetts Masters of Science in Data Analytics Engineering GPA: 3.92 Course Work: MLOps, NLP, Data Mining, Intro to Computational Statistics, Data Management for Analytics	May 2025
Guru Gobind Singh Indraprastha University, New Delhi, India Bachelor of Technology in Mechanical and Automation Course Work: Operations Research, Optimization Techniques, Numerical Analysis and Statistical Techniques	Sept 2020
