Anirudh Hegde

Data Analyst | Business Intelligence Analyst | Analytics Engineer

8574924515 | Boston, MA | anirudh.hegde07@gmail.com | LinkedIn | GitHub

Summary

Data Analyst with 4+ years delivering business intelligence and data-driven insights through SQL, Python, Tableau, and Power BI. Expert in dashboard development, KPI tracking, A/B testing, and statistical analysis. Proven track record building reporting systems and data visualizations that drive strategic decision-making across sales, marketing, and operations teams.

Skills

Analytics:	SQL, Python, A/B testing, Hypothesis testing, Segmentation, Regression, Time-Series Forecasting, Statistical Modeling
Business Intelligence:	Tableau, Power BI, Excel (Advanced), Dashboard Development, KPI tracking, Executive Reporting, Data Storytelling
Data Engineering:	ETL/ELT, Airflow, Azure Data Factory, Snowflake, BigQuery, Data Mdeling, Pipeline Optimization, PySpark
Statistics:	ANOVA, Experimental Design, Power Analysis, Chi-square tests, T-tests
Tools:	Git, Agile/Scrum, Cross-Functional Collaboration, Data Governance, Decision Support

Experience

Assistant Manager (Data Analyst) June 2022 – July 2023
Maruti Suzuki India Limited Gurugram, India

- Built SQL and Python forecasting models on 600K+ transactions across 12 segments, improving accuracy by 12pp and driving $1M in revenue gains by informing sales strategy and commercial decisions
- Automated an A/B testing framework in Python using Chi-square tests, t-tests, and power analysis to evaluate 15+ marketing campaigns, cutting analysis time by 40% and improving campaign ROI by 8%
- Led competitive market analysis in Power BI across sales, customer, and market-share data, identifying 3 product expansion opportunities worth $2M+ and presenting recommendations to C-suite leadership

Assistant Manager (Business Analyst) Jan 2021 – June 2022
Godrej & Boyce Mfg Co Ltd New Delhi, India

- Performed customer segmentation on 100K+ customers using RFM modeling and K-Means clustering in SQL and Python, improving campaign ROI by 25% and lifting repeat purchases by 12%
- Developed a 30-day churn prediction model in SQL and Python and built Power BI dashboards that enabled proactive retention campaigns, reducing quarterly churn by 5% and protecting $1.2M in annual revenue
- Automated data integration and KPI reporting for weekly sales and marketing data using ETL workflows and Power BI, cutting manual reporting effort by 75% and giving leadership clearer visibility into customer performance

Data Analyst May 2019 – Jan 2021
AG Electrochem Gurugram, India

- Built Tableau dashboards querying SQL databases to track sales performance across 25+ SKUs, reducing weekly reporting time by 75% (8 hours to 2 hours) and giving leadership faster access to product mix and revenue trends
- Implemented data validation and quality checks in Python, improving data accuracy by 40% and reducing manual rework while ensuring reliable reporting for sales and operations teams

Projects

E-commerce Conversion Optimization | *Python, Statistical Testing, Pandas, Plotly* **Link**

- Conducted rigorous statistical analysis of product page redesign A/B test to evaluate conversion impact across regional and device segments, using Chi-square, Fisher's Exact tests, and power analysis on 2K+ user interactions to ensure experimental validity
- Delivered selective rollout recommendation to leadership after identifying 18.4% conversion uplift in Europe-Tablet segment (p=0.015), projecting $500K+ annual revenue increase and preventing full launch in underperforming segments

FinSight Nexus – Financial Portfolio Analytics | *Azure Data Factory, Databricks (PySpark), Synapse Analytics, Power BI* **Link**

- Designed end-to-end cloud analytics pipeline to automate portfolio monitoring and reporting, using Azure Data Factory for ingestion, Databricks (PySpark) for transformation, and Synapse Analytics for OLAP modeling with SCD Type 2 dimension tracking
- Created Power BI dashboards for real-time risk-return analysis to investment teams, reducing manual processing from 4 hours to 15 minutes and enabling faster portfolio rebalancing decisions

Customer Churn Prediction Engine | *Python, XGBoost, Random Forest, SMOTE* **Link**

- Developed predictive churn model to support customer retention strategy, analyzing 7K+ telecom customer records to identify key drivers (contract type, tenure, monthly charges) using statistical modeling and achieving 87% accuracy with SHAP-based interpretability
- Delivered Tableau dashboard and targeted retention recommendations to marketing leadership, enabling early intervention with high-risk customer segments identified 30 days before expected churn

Education

Northeastern University, Boston, Massachusetts May 2025
Masters of Science in Data Analytics Engineering | GPA: 3.92
Course Work: MLOps, NLP, Data Mining, Intro to Computational Statistics, Data Management for Analytics

Guru Gobind Singh Indraprastha University, New Delhi, India Sept 2020
Bachelor of Technology in Mechanical and Automation
Course Work: Operations Research, Optimization Techniques, Numerical Analysis and Statistical Techniques
